Volume 5 Issue 9

Message from the Director

Debbie Ridgely - OSDBU Director

Welcome to spring! Our monthly Vendor Outreach Sessions are still filling extremely rapidly and the feedback remains excellent. Our SB success stories features CSSS.Net, which is helping the Centers for Medicare and Medicaid Services (CMS) with the prescription drug card. VNS Group, Inc. is supporting the National Library of Medicine with research, organization, translation and records management. Finally, Oleen is a new healthcare support contractor for CMS. Briefings to HHS senior management are complete on the results of our Climate Assessment of the SB Program. Positive changes and improvements are being implemented throughout the Department. Emphasis remains on the Service-Disabled Veteran and the HUBZone programs. We need the support and cooperation from all stakeholders to make the SB Program a success.

"Small Business is the HEART of our Economy."

[Director's Message in Spanish](#)

CSSS.NET Grows 400% in 16 Months! Attributes Growth to Success with CMS

CSSS.NET grew 400% in a sixteen-month period eighteen months ago. It continues to experience rapid growth due to their dedication to and the satisfaction from their customers. These include CMS (Center for Medicare and Medicaid Services), AFWA (Air Force Weather Agency), USSTRATCOM (US Strategic Command), the Veterans Health Administration (VHA) and national commercial customers.

One of the contributing factors to CSSS.NET's tremendous success at CMS is due to the HHS small business office. CMS has been pleased with the caliber of services CSSS.NET has provided since 2002.

Founded by Lisa Wolford in 1997, CSSS.NET is a certified 8(a), service-disabled veteran-owned, woman-owned and small disadvantaged business.

It provides Information Technology services that comprise full lifecycle development as well as systems integration.

It initially worked with CMS on the Payment Validation contract. CSSS.NET focuses on processing retroactive requests for changes to beneficiary enrollment, demographic data, and special health status categories.

CSSS.NET is now a subcontractor on a number of projects for CMS. Among these are the Prescription Drug Discount Card – Transitional Assistance Program (PDDC-TAP), Medicare Managed Care Payment Validation (MMCPV), Midwest Integrity Contract (MIC), and Durable Medical Equipment – Benefit Integrity Support Center (DME-BISC).

Headquartered near Omaha, NE., the award-winning company has offices in Chicago, IL, Oakland, CA. and Arlington, VA. Visit www.csss.net.

Award-Winning Government Contractor Expands Horizons

"Competing for federal government contracts is a challenge for small businesses, but patience and persistence pay off," said Vesselina Stoytcheva, Owner and President of VNS Group, Inc. The award-winning certified 8(a) small woman-owned business, which celebrates its fifth anniversary this year.

"My goal is to lead the company efforts to become a known and successful government contractor in the information management field," says Stoytcheva.

VNS Group, Inc. specializes in library management and support, information research and organization, translation, records management, and administrative services.

National Library of Medicine

VNS Group, Inc. provides offsite cataloging of materials in English and in foreign languages as well as translation services for the National Institutes of Health's, National Library of Medicine. According to Christine Mandic, "The National Library of Medicine's Technical Services Division, Cataloging Section has been extremely pleased with VNS Group's professionalism in regards to the various cataloging contracts we have with VNS Group."

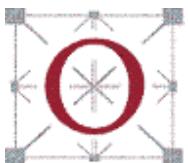

The company also works with the Office of the Comptroller of the Currency, the U.S. Army Heritage and Education Center, the Smithsonian Institutions, the American Psychological Association, and Versar, Inc.

Robert Updegrove, Administrative Librarian at the Office of the Comptroller of the Currency says, "My library has been a client of VNS Group, Inc. since 2003. During this period of time, their responsibilities have grown to include a number of technical services functions not part of the original requirement. I am pleased by their performance and the attention the company has given to our contract."

VNS Group, Inc. participates in the HHS Small & Disadvantaged Business Utilization's Vendor Outreach Sessions. The company credits the sessions with providing assistance in understanding the procurement process, so they can formulate a marketing strategy to obtain more government contracting opportunities within HHS. Visit www.vnsgroup.com.

We're On It! – Oleen Takes a Proactive Stance In Gaining Government Business

Strategizing is the key to obtaining additional government business. At least this is what Oleen, a veteran-owned small business based in Silver Spring, MD, is learning. The healthcare consulting firm has worked with the Centers for Medicare & Medicaid Services (CMS) since December 2006. Now given its experience with CMS through health plan support and implementations, Oleen is taking steps to gain more government contracts.

As part of its strategy, Oleen's management has compiled a database of contacts based on Vendor Outreach Sessions (VOS), such as the one HHS held on January 9th. It capitalizes on these opportunities to network with potential partners. The firm also researches information on contractors using the web, electronic newsletters and publications.

Oleen provides Medicare, Medicare Advantage, and Medicaid assessment, system design, application development, and configuration services to healthcare plans and government contractors. Its experience allows it to help its clients address business and technical challenges related to enrollment/membership, provider network and contracting, benefits, medical policy

oversight, call center support, and claim processing.

In addition, Oleen has a VistaA team. Developed by the Department of Veterans Affairs, VistaA is an enterprise-wide, fully integrated, fully functional information system built around an electronic health record. The VistaA system supports hospitals and clinics serving veterans throughout the U.S. Oleen's expertise with VistaA includes system selection, system configuration, technical implementation, and post-implementation services.
